Education

Chitkara University

Bachelor of Engineering (B.E.) in Computer Science and Engineering — CGPA: 9.29

2024 — Present

Rajpura, Punjab

Government Model Senior Secondary School, Sector 19-C

Senior Secondary Education (Class XII) — Percentage: 81.6%

2021 — 2023

Chandigarh, India

Skills

Languages: Java, C++, Python, JavaScript, TypeScript

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend & Databases: Node.js, Express.js, MongoDB, MySQL, Supabase

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, REST APIs, Vercel

Experience

Concentrix Daksh

Advisor

Full-time — Onsite

April 2024 – September 2024

- Resolved **50+ daily customer inquiries** in real-time while maintaining a **95%+ customer satisfaction (CSAT) rating** and adhering to strict SLAs.
- Collaborated with a **5-member support leadership team** to streamline ticketing workflows, reducing overall customer query resolution times by **15%**.
- Maintained comprehensive product knowledge databases to resolve customer issues within an average time-to-resolution of **under 4 minutes**.

Projects

KnowMo – Academic Resource Platform | *Next.js, Express, MongoDB, Gemini API* | knowmo.vercel.app

- Architected a full-stack academic resource platform using Next.js 16 (App Router), React 19, TypeScript, and Tailwind CSS 4, supporting structured content across **5+ academic file categories** for **10+ departments**.
- Engineered an AI practice test engine integrating the Google Gemini API (@google/genai) to generate **20+ context-aware MCQs** from prompts or uploaded images, **reducing exam preparation time by 85%**.
- Developed **15+ secure RESTful API endpoints** with Multer image processing and JWT user authorization, integrating Framer Motion on the frontend to deliver smooth, modern transitions under **100ms**.

Anchor – Social Networking Platform | *React.js, Node.js, Express.js, MongoDB* | anchor-ten-pi.vercel.app

- Built a full-stack MERN networking platform with secure custom JWT cookie authentication and **10+ database collection schemas** supporting flexible creation, reads, updates, and deletions (CRUD).
- Enabled instant user communication by integrating Socket.io for **sub-50ms real-time chat delivery**, and implemented MapLibre geolocation search to discover nearby peers within a customizable **50km radius**.

Addax – AI Learning Assistant | *Next.js, Express, MongoDB, Prisma, Gemini API* | addaxx.vercel.app

- Engineered a Retrieval-Augmented Generation (RAG) pipeline parsing YouTube transcripts into **500-character vector chunks** using Gemini API embeddings to enable interactive learning Q&A with **100% accurate citations**.
- Designed a TypeScript Express backend using Prisma ORM with MongoDB to store and index **1,000+ conversation history logs**, optimizing database query search times by **40%**.
- Implemented dual-mode user authentication (Google OAuth 2.0 and Bcrypt) alongside a Next.js UI, allowing students to generate instant video summaries and save up to 70% of active video watching time.

Achievements

- Solved **400+ coding problems on LeetCode** focusing on Dynamic Programming, Graphs, and Tree structures, strengthening algorithmic thinking and problem-solving skills.
- Managed and organized technical workshops and coding competitions for **150+ students** as a core organizer in the **GFG Campus Body**.
